

SAFETY KID II

SAFETY KID 2 IS DESIGNED TO PREVENT
PASSENGERS FALLING OUT OF
CHAIRLIFTS

ALL LIFTS
ADAPTABLE

LIGHTWEIGHT

NO DRILLING

THE BEST RESTRAINT PRODUCT ON THE MARKET

The device is intended to prevent the fall of passengers and the risk of «sub-marining» during the trip. The device is placed between the passengers' legs and falls in place when the bar comes down. Number of devices needed per chairlift will be based on the choice of the operator.

DEVICE BENEFITS

- Economical and efficient
- No Piercing of the bar
- Rounded shape on the bottom to minimize shocks and impacts
- Section optimized for inertia in the direction of passengers' fall
- Flexibility in the transverse direction
- Lightweight device
- Durable and interchangeable flexible plastic
- Can be mounted in curved portion of guardrail
